Connecting the Continent Obsidian Cliff

Obsidian Cliff, Yellowstone Park, is on the Mammoth-Spotswood Road, 12.5 miles from Mammoth Hot Springs. This volcanic flow brought molten lava to the region in the early days of geothermal activity on the western slope of Yellowstone attracted Indians to its quarry.

POST CARD

Dear Friends,
Greetings from Wyoming.
Obsidian Cliff is a magnificent place. Hope it is still here to enjoy when you visit.
Best wishes,
Near neighbors

Mr. and Mrs. William Clark
